SUMMARY

A skilled software developer with hands-on expertise in designing and implementing distributed enterprise applications in **Java**, **Jakarta EE**, **Spring** and TypeScript / **React**, using **event** streaming and **async** processing approaches implementing system design patterns and principles, such as microservices (**Spring Boot**, **Kubernetes**) with a strong focus on product reliability and resilience, long-term maintainability, performance optimization, as well as reduction in latency and incident rate. Has a working knowledge of **Python** as pertains to the agentic AI.

Proven track record of owning high-impact **initiatives**, technical leadership and driving **architectural decisions**, conducting **code reviews**, **mentoring** junior developers.

TECHNICAL SKILLS

Java · Java SE 11, OpenJDK 21 / 25 LTS (lambda, streams, records, sealed classes, virtual threads) / 26 STS; builds Azul Zulu, Eclipse Temurin; Jakarta EE 11, Spring Framework 6 / 7; Hibernate, REST APIs · **JSF** · Primefaces 10 / 11 · **Events** · Spring events; Apache Kafka 4.0 (Clients / Streams)

JavaScript · ES 6 / 7, TypeScript, React, Vue

Versioning · git; BitBucket / JIRA Confluence; Maven, Gradle · **CI / CD** · Jenkins; GitLab CI, GitHub Actions, FluxCD · **QA** · SonarQube · **Containerization** · Spring Boot 4, Kubernetes, Helm · **Metrics, monitoring & alerting** · Cisco Splunk / AppDynamics; Prometheus, Grafana; ElasticSearch

Agentic AI · Python; Claude Code, GitHub Copilot; MCPs; agentic Skills for Claude Projects, GLM-5; OIDC, SAML; Perplexity / Comet, Notion

Databases · Oracle, PostgreSQL, Azure SQL, MariaDB; GraphQL

Cloud / IaaS · AWS (EKS, EC2, Lambda, S3, SNS)

Methodology · Clean Architecture, design patterns, clean code, DDD, SOLID, DRY, TDD / BDD

IDEs & Tools · IntelliJ IDEA 2026.1, VS Code, Eclipse; PL/SQL Developer, Softerra LDAP Browser, JXplorer

HIGHLIGHTS

Performed **technical audits** and gap analyses as well as **automated testing** & **QA** using standard tools and agentic AI

Configured **CI/CD** pipelines, performed analysis of runtime errors and memory utilization in production

Practical experience with **AI coding** assistants and agentic AI-aided development, in evaluating application modules as regards AI readiness

Industry experience at large companies in science / trade publishing, Web banking, insurance claims handling, telecom provider order processing, legal compliance in securities trading

Delivered software projects using **Agile** methodology (Scrum), collaborating effectively in iterative, **DevOps**-oriented teams, including **near-shore** (Portugal, Bulgaria) and **global** (UK, India)

Language skills: Fluent in German, French and English, intermediate Dutch

PROJECT EXPERIENCE

Senior Java / Python Applications Developer, Osterholm B.V., Utrecht, Netherlands (hybrid)	**07.2026–**
R&D	*AI agent instrumentation: using **Comet Opik** for experimentation and debugging* *Code hosting on Cursor's **Origin** platform* *Rolling out my company's Website design with Goggle **Stitch***
Java Stack	Java 26 STS; Kafka 4.0 (Clients / Streams) · VueJS · Spring Boot, Kubernetes · IntelliJ IDEA 2026.1 · GitLab CI
Agentic AI	Comet Opik · Python, Strands (OpenAI), FastAPI · Claude Code, GLM-5; Claude Projects, MCPs; Notion
Senior Java / Python Applications Developer, 11th Dimension GmbH, Munich, Germany (remote)	**08.2024–06.2026**
Project	*AI-aided design and development of a Kafka-sourced Web dashboard application*
Java Stack	Java 21 / 25 LTS; Kafka 4.0 (Clients / Streams) · React / VueJS, React Router; Next.js, App Router; Gradle, GitHub Actions, GitLab CI, GitOps / FluxCD; OIDC, SAML · Spring Boot 4, Kubernetes · Prometheus · AWS (EC2, Lambda, SQS) · PostgreSQL, ScyllaDB, MariaDB, GraphQL · Redis cache · ActiveMQ **Spring 7** · Spring Security, Spring Scheduling, Spring Data, Spring Events, Spring Cloud, Spring AI
Agentic AI	Python, Strands (OpenAI), FastAPI · Claude Code, GLM-5 · Ollama, OpenRouter · Cursor, Codex, ZCode, Qwen, Kimi, MiniMax, DeepSeek, Nemotron; MCPs; Langfuse, LangChain; Notion
Tasks	Developed Spring Boot, Python, Node.js applications using GitHub Copilot, Claude Code, AI assistants Integrated LLM responses in the application output using LangChain4J and Python Composed Redis cache invalidation and object eviction strategies
Senior Java Applications Developer, A1 Telekom Austria AG, Vienna, Austria (hybrid, remote)	**07.2022–06.2024**
Project	*Implementing new features for* Wholesale Vorleistung (Customer Order Tracking System), *moving in stages from the Spring-based modulith to Spring Boot and to microservices deployment in Kubernetes*
Tech Stack	OpenJDK 11 / 17+; JUnit5, Mockito, AssertJ; Primefaces 10, JavaScript / React · SOAP, REST, Kafka 3.6 · Maven, Gradle · SonarQube · git / BitBucket · Kubernetes · Tomcat 9 · Spring Boot 3 · Cisco AppDynamics **Spring 6** · Spring Security, Spring Batch, Spring Scheduling, Spring Data, Spring Events **DB** · Oracle 12c · Azure SQL DB · JPA (Hibernate 5, Criteria API)
Tasks	Handled high-priority and production issues; analyzed error reports and logs and prepared bug fixes for production deployments Determined the scope of, packaged and documented data corrections and migrations Performed feasibility studies and effort estimations of business requirements Split off parts of the modulith backend to separate Spring Boot microservices deployed to A1 Web-based Docker / Kubernetes infrastructure Designed and built interfaces in TypeScript / React, e.g. a single-page application to enable Austrian address lookup for fiber optics service availability checks Embedded an in-house Angular geodata application into internal fiber optics info pages, rewriting the geodata response, to facilitate fiber optics availability checks and service vehicle route optimization for A1 Telekom field technicians Used Spring event listeners and scheduled message queue and database pollers to maintain order processing states in sync and to trigger related postprocessing events that ensured application data consistency and reliability Conducted mandatory code reviews to ensure code quality, pair programming with junior team members

Senior Java Applications Developer, A1 Telekom Austria AG, Vienna, Austria (hybrid)	**02.2020–06.2021**
Team	*Wholesale Vorleistung* (a Web portal for Internet bandwidth and mobile connectivity resellers focused on order tracking and order status updates)
Project	*Migration of the application modulith from Java 7 to Java 11 LTS*
Tech Stack	OpenJDK 11; JUnit5 · Primefaces 10, JavaScript / TypeScript · SOAP, REST · Maven, Gradle · SonarQube · git / BitBucket; JIRA Confluence; Jenkins · Tomcat 9; bash **Spring** 6 (Spring Security, Spring Batch, Spring Scheduling) · **DB** · Oracle 12c, JPA (Hibernate 5, Criteria API);
Tasks	Migrated an existing order-tracking Java 7 application to Java 11 / Primefaces 10 on Tomcat 9, added Spring Security, implemented a complete overhaul of the frontend (HTML, CSS, JavaScript, cookies, dynamic navigation menus, Primefaces widgets) Configured caching of Hibernate query results and application pages using EhCache Migrated Java classes from Spring 5 to Spring 6, switched from XML configuration files to Spring configuration classes; migrated cache definitions from EhCache 2 to EhCache 3 Handled high-priority and production issues; analyzed error reports and logs, prepared hotfix artifacts for production deployments Determined the scope of, packaged and documented data corrections and migrations Secured credentials used in configuration files by replacing open text with references to entries in an open-source password vault
Java AWS Applications Developer, 11th Dimension GmbH, Munich, Germany	**03.2018–12.2019**
Project	*Web interface for a natural-language dictionary*
Tech Stack	JDK 8, Kotlin; JUnit 4, Mockito · JavaScript, TypeScript, React · Oracle 12c; MongoDB 4 · SonarQube · AWS (EKS, S3, EC2, Lambda, SNS) · Spring Boot 2.0; Docker, Kong
Tasks	Configured and queried AWS instances Created AWS CLI scripts to automate installations, reduce incidents and improve delivery speed
Senior Java API Test Developer, Bundesagentur für Arbeit, Nuremberg, Germany	**10.2017–02.2018**
Project	*COLIBRI Umbau: Entwicklung von mitbenutzten Software-Lösungen für API- und Acceptance-Testing* (“*COLIBRI Redesign: Developing cross-team API and acceptance testing solutions*”)
Tech Stack	JDK 8; JUnit 4, Mockito, PowerMock; Gherkin, Cucumber · WebLogic 12.2 · Oracle 11g · JaCoCo, SonarQube · git / BitBucket, Jenkins
Tasks	Developed rule-based API, acceptance and integration tests using Gherkin, Cucumber
JBoss ESB Applications Developer, Allianz Technology SE, Vienna, Austria	**2015–2017**
Project	*Processing SOAP Messages in the ESB using JBoss Fuse ServiceWorks server*
Tech Stack	JDK 7; JUnit 3, Arquillian; SOAP, REST · DB2 · ElasticSearch **Server**: JBoss Fuse ServiceWorks ESB (Apache Camel, Apache CXF, Switchyard, Drools; RESTEasy) **Build**: SVN, Nexus; Jenkins; RPMs, Groovy, Ansible
Tasks	Designed and developed Apache Camel routes and Switchyard definitions for JBoss Fuse ServiceWorks, calling Webservice endpoints using Apache CXF, programmed REST Webservices with RESTEasy

PREVIOUS EMPLOYMENT

JBoss / JEE / Primefaces Consultant, UniCredit / GCC Reporting Risk, Munich, Germany	**2012–2014**
Tech Stack	JDK 7; JUnit 3 · JavaScript / TypeScript · Primefaces · JBoss 7 · Oracle 10
Java and **SQL** consultant on DB2 and Web development projects in **Veneto, Italy**	**2006–2012**
Clients	**Cerved** (corporate credit scoring), **Consorzio Triveneto** (on-line banking), **Enel** (nation-wide utilities billing)
Internet Product Developer, **John Wiley & Sons, Inc. - Journals**, Hoboken, NJ, USA	**2001–2005**
Tasks	Developed and maintained scripts in Perl, bash, ksh, sed, nawk, programmed in Java, coordinated with remote teams at Wiley-VCH, Weinheim, Germany and at the Wiley offices in Chichester, UK Automated using Perl and bash the electronic submission workflow for article supplementary materials

COURSES & CERTIFICATIONS

Software Architecture Training Program and Certification | Syllabus	**10.2024–04.2025**
Global Dev Experts, Online	
Part-time executive **Master in Project Management | Topics**: PMI, PRINCE2, IPMA	**10.2010–04.2011**
IlSole24ORE Business School, Milan, Italy **Title**: *Lavorare per progetti: tecniche, strumenti e skill manageriali* (“*Splitting work into projects: Management techniques, tools and skills*”)	

EDUCATION

B.A., School of General Studies, Columbia University in the City of New York, U.S.A.	**1998**
Courses in formal logic, linear algebra, analysis, diff. equations, philosophy; GPA in major 3.5/4.0	

GITHUB

Since 2019 I maintained a couple of personal projects on my own **GitHub** (coding PoCs and content publishing) learning GitHub Actions, Lint, CodeQL, Jekyll, Liquid, OIDC, FluxCD, a touch of Ruby in the process.

BUSINESS DETAILS

Osterholm B.V. (Limited)
Arthur van Schendelstraat 500, 3511 MH Utrecht, Netherlands
KvK-nr. 89256581 · **VAT number**: NL864925888B01 · VIES

ADMINISTRATIVE DETAILS

Citizenship: U.S.A. · **Residence permit**: NL, expires on 14.03.2030 · **Residence**: Leiden (ZH), Netherlands · **Work authorization**: self-employed[1] · **Driving license**: Class B

[1] "Arbeid als selfstandige. Arbeid in loondienst alleen toegestaan met TWV"
