Bruno.Samueli@protonmail.com

Senior Java Applications Developer

Cologne, NRW, Germany

Available for project work

linkedin.com/in/brunosamueli bromveldt.github.io github.com/bromveldt

HIGHLIGHTS

- Performed **technical audits** and gap analyses as well as **automated testing** & **QA** using standard tools and agentic AI

- Configured **CI/CD** pipelines, performed analysis of runtime errors and memory utilization in production

- Practical experience with **AI coding** assistants and agentic AI-aided development, in evaluating application modules as regards AI readiness

- **Industry experience** at large companies in science / trade publishing, Web banking, insurance claims handling, telecom provider order processing, legal compliance in equity trading

- **Language skills**: Fluent in German, French and English, intermediate Dutch, native Italian

SUMMARY

A skilled software developer with hands-on expertise in designing and implementing distributed enterprise applications in **Java**, **Jakarta EE**, **Spring** and TypeScript/**React**, leveraging **event** streaming and **async** processing approaches as well as system design around microservices (**Spring Boot**, **Kubernetes**).

Proven track record of owning high-impact **initiatives**, technical leadership and driving **architectural decisions**, conducting code reviews and mentoring junior developers.

Delivered software projects using **Agile** methodology (Scrum), collaborating effectively in iterative, **DevOps**-oriented teams, including **near-shore** (Portugal, Bulgaria) and **global** (UK, India).

A strong focus on product reliability and resilience, long-term maintainability, performance optimization, as well as latency and incident reduction.

TECHNICAL SKILLS

Java · Java SE 11, OpenJDK 21 / 25 LTS (lambda, streams, records, sealed classes, virtual threads) / 26 STS; builds Azul Zulu, Eclipse Temurin; Jakarta EE 11, Spring Framework 6 / 7; Kafka Clients / Streams; Hibernate; Spring Boot 4; OIDC, SAML; RESTful APIs; OIDC, SAML · **JSF** · Primefaces 10 / 11 · **Events** · Spring events; Apache Kafka 4.0.x (Clients / Streams)

JavaScript · ES 6 / 7, TypeScript, React, Vue, some Next.js, Angular

Versioning · git; BitBucket / JIRA Confluence; Maven, Gradle · **CI / CD** · Jenkins; GitLab CI, GitHub Actions, FluxCD · **QA** · SonarQube · **Containerization** · Docker, Kong, Kubernetes, Helm Charts

Agentic AI · Claude Code, GitHub Copilot, Cursor, Codex, ZCode, Qwen, Kimi, MiniMax, DeepSeek, Nemotron; MCPs; agentic Skills; Ollama, OpenRouter; Perplexity / Comet, Notion

Databases · Oracle, PostgreSQL, Azure SQL, MariaDB; GraphQL · **Cloud / IaaS** · AWS (EKS, EC2, Lambda, S3, SNS)

Methodology · Clean Architecture, design patterns, clean code, DDD, SOLID, DRY, TDD / BDD

Metrics, monitoring & alerting· Cisco Splunk **/** AppDynamics; Prometheus, Grafana; ElasticSearch

IDEs & Tools · IntelliJ IDEA 2026.1, VS Code, Eclipse; PL/SQL Developer, Softerra LDAP Browser, JXplorer

CURRENT TOPICS

Senior Java / Python Applications Developer, Osterholm B.V., Utrecht, Netherlands	**07.2026–**
Project	*R&D in AI agent instrumentation:* ***Comet Opik*** *for experimentation and debugging*
Tech Stack	Java 26 STS; Kafka Clients / Streams · React / TypeScript / Vue, React Router · MariaDB, GraphQL · Spring Boot 4, Kubernetes · IntelliJ IDEA 2026.1 · GitLab CI · Python, Strands (OpenAI), FastAPI · Claude Code, GLM-5; MCPs; Notion

PROJECT EXPERIENCE

Senior Java / Python Applications Developer, 11th Dimension GmbH, Munich, Germany (remote)	**08.2024–06.2026**
Project	*AI-aided design and development of a Kafka-sourced Web dashboard application*
Tech Stack	Java 21 / 25; Kafka Clients / Streams · React / TypeScript / Vue, React Router; Next.js, App Router · Spring Boot 4; OIDC, SAML; Gradle, GitHub Actions, GitLab CI, GitOps / FluxCD; Docker, Kong Gateway, Kubernetes, Helm Charts · PostgreSQL, ScyllaDB, MariaDB, GraphQL · Kafka 4.0.x (Clients / Streams) · Prometheus · Python, Strands (OpenAI), FastAPI · AWS (EC2, Lambda) · Claude Code, GLM-5; MCPs; Langfuse; Notion
Tasks	- developed Spring Boot, Python, Node.js applications using GitHub Copilot, Claude Code, AI assistants - integrated LLM responses in the application output using LangChain4J and Python
Senior Java Applications Developer, A1 Telekom Austria AG, Vienna, Austria (hybrid, remote)	**07.2022–06.2024**
Project	*Implementing new features for* Wholesale Vorleistung (Wholesale Customer Order Tracking System), *moving in stages from the Spring modulith to Spring Boot and to microservices deployment in Kubernetes*
Tech Stack	OpenJDK 11 / 17; JUnit5, Mockito, AssertJ · git / BitBucket; Maven, Gradle· Primefaces 10 · JavaScript / TypeScript / React · Spring 6 (Spring Security, Spring Batch, Spring Scheduling, Spring Data); Spring Boot 2 / 3; JPA (Hibernate 5, Criteria API); SOAP, REST · Tomcat 9 · Oracle 12c · Kubernetes; GitOps / FluxCD · ActiveMQ, Azure SQL DB · Spring Events, Kafka 3.6 · SonarQube · Cisco AppDynamics
Tasks	- handled high-priority and production issues; analyzed error reports and logs and prepared bug fixes for production deployments - determined the scope of, packaged and documented data corrections and migrations - performed feasibility studies and effort estimations of business requirements - split off parts of the modulith backend to separate Spring Boot microservices deployed to A1 Web-based Docker / Kubernetes infrastructure - designed and built interfaces in TypeScript / React, e.g. a single-page application to enable Austrian address lookup for fiber optics service availability checks - embedded an in-house Angular geodata application into internal fiber optics info pages, rewriting the geodata response, to facilitate fiber optics availability checks and service vehicle route optimization for A1 field technicians - leveraged Spring event listeners and scheduled message queue and database pollers to keep order processing states in sync and to trigger related postprocessing events that ensured data consistency and reliability - conducted mandatory code reviews to ensure code quality, pair programming with junior team members
Senior Java Applications Developer, A1 Telekom Austria AG, Vienna, Austria (hybrid)	**02.2020–06.2021**
Team	*Wholesale Vorleistung* (a Web portal for Internet bandwidth and mobile connectivity resellers focused on order tracking and order status updates)

Project	*Migration of the application modulith from Java 7 to Java 11 LTS*
Tech Stack	OpenJRE 11; JUnit5 · Primefaces 10, JavaScript / TypeScript · Spring 6 (Spring Security, Spring Batch, Spring Scheduling); JPA (Hibernate 5, Criteria API); bash; SOAP, REST · Tomcat 9 · Oracle 12c · git / BitBucket; JIRA TaskTrack, Confluence; Maven, Gradle; Jenkins · SonarQube
Tasks	- migrated an existing order-tracking Java 7 application to Java 11 / Primefaces 10 on Tomcat 9, added Spring Security, implemented a complete overhaul of the frontend (HTML, CSS, JavaScript, cookies, dynamic navigation menus, Primefaces tags) - configured caching of Hibernate query results and application pages using EhCache - migrated Java classes from Spring 5 to Spring 6, switched fromXML configuration files to Spring configuration classes; migrated the cache definitions from EhCache 2 to EhCache 3 - handled high-priority and production issues; analyzed error reports and logs, prepared bug fixes for production deployments - determined the scope of, packaged and documented data corrections and migrations - secured credentials used in configuration files by replacing open text with references to entries in an open-source password vault
Java AWS Applications Developer, 11th Dimension GmbH, Munich, Germany	**03.2018–12.2019**
Project	*Web interface for a natural-language dictionary*
Tech Stack	JDK 8, Kotlin; JUnit 4, Mockito · JavaScript, TypeScript, Angular · Spring Boot 2.0; Docker, K3d · Oracle 12c; MongoDB 4 · SonarQube · AWS (EKS, S3, EC2, Lambda, SNS)
Tasks	- configured and queried AWS instances - created AWS CLI scripts to automate installations, reduce incidents and improve delivery speed
Senior Java API Test Developer, Bundesagentur für Arbeit, Nuremberg, Germany	**10.2017–02.2018**
Project	*COLIBRI Redesign: Cross-team testing solutions* (“*COLIBRI Umbau: Entwicklung von mitbenutzten Software-Lösungen für API- und Acceptance-Testing*”)
Tech Stack	JDK 8 · JUnit 4, Mockito, PowerMock; Gherkin, Cucumber · WebLogic 12.2 · Oracle 11g · git / BitBucket, Jenkins · JaCoCo, SonarQube
JBoss SW Applications Developer, Allianz Technology SE, Vienna, Austria	**2015–2017**
Project	*Processing SOAP Messages in the ESB using JBoss Fuse ServiceWorks*
Tech Stack	JDK 7; JUnit 3, Arquillian; SOAP, REST · SVN, Nexus; Jenkins; RPMs, Groovy, Ansible · DB2, LDAP · ElasticSearch · **ESB** · JBoss Fuse ServiceWorks · Apache Camel, Apache CXF, Switchyard, Drools; RESTEasy
JBoss / JEE Developer, UniCredit / GCC Reporting Risk, Munich, Germany	**2012–2014**
Tech Stack	JDK 7; JUnit 3 · JavaScript / TypeScript · Primefaces · JBoss 7 · Oracle 10

PREVIOUS EMPLOYMENT

Java and **SQL** consultant on DB2 and Web development projects in **Veneto, Italy**	**2006–2012**
Clients	**Cerved** (corporate credit scoring), **Consorzio Triveneto** (on-line banking), **Enel** (nation-wide utilities billing)
Internet Product Developer, John Wiley & Sons, Inc. - Journals, Hoboken, NJ, USA	**2001–2005**

Tasks	- created and maintained scripts in Perl, bash2, ksh, nawk, programmed in Java - automated the electronic submission workflow for journal article supplementary materials - coordinated with remote teams at Wiley-VCH, Weinheim, Germany and at the Wiley offices in Chichester, UK

COURSES & CERTIFICATIONS

Software Architecture Training Program and Certification | Syllabus	**10.2024–04.2025**
Global Dev Experts, Online	
Part-time executive **Master in Project Management | Topics**: PMI, PRINCE2, IPMA	**10.2010–04.2011**
IlSole24ORE Business School, Milan, Italy **Title**: *Lavorare per progetti: tecniche, strumenti e skill manageriali* ("*Organizing work around projects: Management techniques, tools and skills*")	

EDUCATION

B.A., Columbia University in the City of New York, U.S.A.	**1998**
Courses in formal logic, algebra, analysis, diff. equations, philosophy; GPA in major 3.5	

GITHUB

Since 2019 I maintained a couple of personal projects on my own **GitHub** (coding PoCs and content publishing) learning GitHub Actions, Lint, CodeQL, Jekyll, Liquid, OIDC, FluxCD, a touch of Ruby in the process.

HOBBIES

jogging, biking
intricacies of genetic genealogy
learning human languages
keeping myself updated at substack.com, anthropic.skilljar.com, medium.com, baeldung.com
